CMI Newsletter - Issue April 2011

CMI - Teamcenter Integration Solution

Visit us at PLM World

T-Systems will present its PLM and CAD solutions at the Siemens PLM Connection Americas, this year in Las Vegas, Nevada, May 2, 2011 – May 5, 2011.

Rio All-Suite Hotel in Las Vegas, NV

We look forward to welcoming you to our booth #28; live demos and latest product information will be available.

- New enhancements for classic CMI (Teamcenter Enterprise)
- CMI RII Enterprise level CATIA integration for Teamcenter Unified
- CATIA V6 integration Roadmap and Strategy
- PDM WebConnector –integrating various PLM and legacy systems while providing uniform access across the enterprise

Are you a CATIA and Teamcenter user? Visit our booth; it will be time well spent.

Classic CMI 9.9 is released

CMI 9.9 for Teamcenter Enterprise was released in April 2011. Highlights:

- Enhanced Reconnect Dialog for Power Users
- Export / Import Functionality for controlled data exchange with partners
- CMI Contextual Menu in CATIA
- CATIA Version Handling

All enhancements are available for Teamcenter with CMI RII as well! Click <u>here</u> to see Release Notes for more details.

PDM WebConnector

PDM WebConnector release 3.3 and 3.4 is coming up in 2011:

- SAP connectivity module, supporting SAP R3 and SAP-PLM
- New test server for unit and performance tests
- Integration of monitoring features into the PWC-Client
- Advanced PWC monitoring including memory and load usage
- New ENOVIA V6 connectivity module including writing of parts and complete product structures
- Enhanced WINDCHILL connectivity module: product structures synchronization including handling of non-product structure data
- Support for Teamcenter V8.3

Click here for more.

CMI RII 3.0 Release for Teamcenter

CMI RII is now available for both Teamcenter 2007 and Teamcenter 8: Get control on your product data in CATIA V5 with an enhanced Check In/Out Data Center:

- Free configurable columns for displaying relevant information from Teamcenter for each CATIA file.
- Geometrical selection and highlight in CATIA Window and dialog.
- Check In/Out Dataset from the CATIA V5 context menu.

Click here to see Release Notes for the latest enhancements.

CMI RII within CATIA V5 and Teamcenter Rich Client

CATIA V6

An increasingly pressing question is how a migration to CATIA V6 would impact my PLM infrastructure. Is it possible to protect my investment in Teamcenter and CATIA?

- How to integrate a CATIA V6 design environment into a Teamcenter-based PDM landscape?
- How to exchange CATIA V6 data with Partners using PDM as a central hub?
- How to drive the CATIA V6 design from Teamcenter product structure configuration?

Learn more about the Dassault Systèmes strategy and what can be expected from T-Systems as a solution provider; stop by our booth (#28).

Best Regards
Your T-Systems PLM Team
