

## **Background Information**

Frankfurt, November 7<sup>th</sup>, 2012

### **T-Systems International is now a Dassault Systèmes Community Partner for its V6 Product Portfolio**

- The new partnership allows T-Systems to develop products for Dassault's new V6 product line.
- The partnership extends the existing partnerships with T-Systems to include new V6 integration products for Teamcenter and SAP.

---

T-Systems International and the French software vendor Dassault Systèmes have expanded their co-operation that has been in place for many years and have signed a Community Partner agreement.

The new agreement will extend T-Systems portfolio to include products for Dassault's V6 platform. Likewise the existing MatrixOne product partnership for the ENOVIA V6 SAP integration will be enhanced.

As an independent IT-Service provider, T-Systems provides CAD (Computer Aided Design) and PLM (Product Lifecycle Management) solutions.

For many years as a Dassault V5 CAA partner, T-Systems has provided high-quality integrations and extensions for Dassault's V5 product portfolio.

The new partnership forms the basis for the development of new integration products for Dassault's V6 product portfolio. T-Systems will also extend its existing Teamcenter integration solutions to include an ENOVIA V6 to Teamcenter adapter.

T-Systems will present its solutions at the 3DEXPERIENCE FORUM Europe held in Brussels on November 21<sup>st</sup> and 22<sup>nd</sup>, 2012. As a Dassault sales and solution partner T-Systems will present its comprehensive PLM Portfolio, ranging from consulting, implementation, to support services.

Further information about the partnership and the specific solutions are available at <https://servicenet.t-systems.com>.
