Demonstration scenario
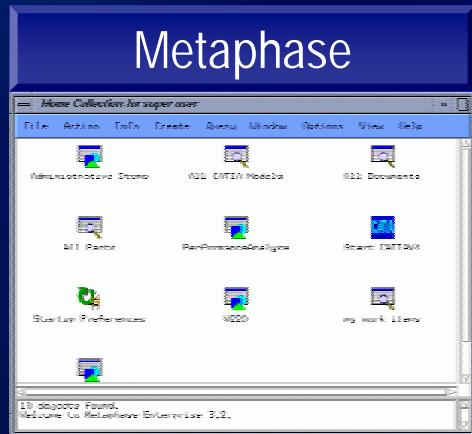

Metaphase

- **Handling of "complex" assemblies in Metaphase**
  - ⇨ Query for assembly objects in database
 - ⇨ Expansion of "Trego" (about 200 parts) in browser

    No remote network access to database!

    Look and feel of Metaphase like in a local installation!

CMI Workbench
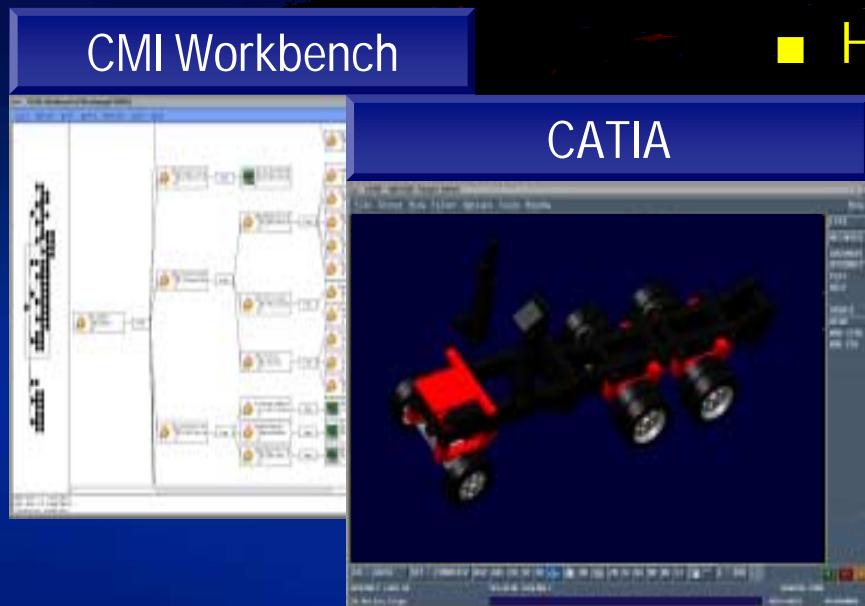

CATIA

- **Handling of "complex" assemblies with CMI**
  - ⇨ Expansion of " Trego" in CMI Workbench
  - ⇨ Mark of subassembly "Basis" in Workbench
  - ⇨ Transfer of "Basis" to CATIA V4
  - ⇨ Modification of position and update in Metaphase
